

WIRE

DATA INTEGRATION SOLUTION
MOTORCITY SYSTEMS

QUALITY

Integration of legacy EDI using the latest methods, such as API, leading to higher quality data.

SPEED

Simple, quick, and configurable setup between customers and trading partners.

MODERN

User-friendly and intuitive workflow with a visually appealing user interface.

AUTOMATION

Process automation means fewer mistakes, less manual data entry, and no worries.

BILLING

Simplified, predictable, and understandable monthly bills.

SUPPORT

Courteous, knowledgeable, and fast customer support provided by industry experts.

- **Cloud-based.** Flexible and scalable to support business growth, accessible from anywhere.
- **Hosted solution.** Reduce infrastructure costs and time spent managing and updating on-premise servers and equipment.
- **Simplified pricing.** Transaction-based model allows forecasting costs even with large changes in volume.
- **Customer focused.** Industry knowledge of integrations means faster onboarding, exceptional support, and self-service.
- **Total transportation solution.** Wire is one component in a family of products. Use one, a few, or all products to manage business needs.

A SCALABLE EDI SOLUTION FIT FOR ANY BUSINESS

Most legacy value-added networks, or VAN's, unchanged since the last century, have not adapted to changes in technology and the supply chain industry. That's where Motorcity Systems comes in. Wire is a modern, cloud-based EDI solution built on the most cutting-edge technologies available today. A SaaS model based on volume, Wire is an alternative to legacy VAN's and can scale to any size organization. Wire sets the stage for communicating with trading partners and serves as a native method for integrating legacy EDI data into an existing system. ■
