

GAUGE™

POWERFUL DATA VISUALIZATION

GAUGE™ Performance and Improve Reporting with In-Depth Data Visualization

Business leaders rely on accurate, up-to-date key performance metrics to make informed and timely decisions. Unfortunately, the data for transportation and logistics enterprises is often managed using multiple disparate systems.

Motorcity Systems developed GAUGE™ to solve the challenge of disconnected data. The cloud-based visualization solution seamlessly connects and correlates all of your systems and data into a dashboard to provide users at all levels with instant access to valuable insights to make smarter business decisions by having:

Standardized Data – GAUGE doesn't stop at bringing together data from different systems. We integrate and standardize the data to provide a complete look inside your business with reporting that delivers the most accurate and complete insights.

Intuitive and Interactive Dashboards – GAUGE combines engaging and meaningful visuals with active queries, powerful sorting, and filters to optimize your use of enterprise data and provide the complete picture of your operations.

Improved Reporting – Access detailed, up-to-date information about your fuel spend, driver hours and pay, revenue, and more. GAUGE comes with a variety of reports curated by industry professionals that fit exactly what you need to make informed business decisions.

Scalable and Versatile Visualization – GAUGE allows you to sync and display an unlimited amount of data from multiple sources. Our robust and dynamic visualization tools scale to meet your business needs.

Automated Business Intelligence – Dynamic Integrations with separate systems allow you to streamline manual processes to increase performance and prevent costly errors.

Industry Expertise and Support – Benefit from Motorcity Systems' courteous, knowledgeable, and reliable customer support from knowledgeable industry experts

A Cloud-Based Transportation Solution Suite

GAUGE is just one component in an entire family of products from Motorcity Systems that drives better results for transportation and logistics providers.

Motorcity Systems delivers software solutions and integration services that enable motor carriers to modernize end-to-end operations. Our solutions are designed to integrate seamlessly and scale with your existing systems to improve visibility, automate dispatch-to-driver communications, and provide a unified workflow experience. Our flexible deployment methodology allows fleets to evolve at their own pace, maximizing the impact of your capital investments for fast ROI.

Take advantage of our entire platform of solutions to improve automation and decision-making fueling growth and profitability.
